Hi Barbara,

I provided some comments on the Formaldehyde repro section, but pretty much just on the epi portion. I didn't have a lot of comments.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

I pointed out some of the things the animal tox section might be missing. Perhaps you and I can discuss next week before I go deeply into reviewing the section?

As such, I didn't look at the overall conclusions yet. And, I don't know what DIT is 😊

-Andrew

Hi Andrew,

This is the draft that Sue sent me and that I copied into the current TR draft. Not sure what DIT is. I guess if you are seeing missing pieces or elements, then perhaps these should be noted so that we can communicate that to Sue.

Hi Barbara (and Andrew), Here is an updated draft of the dev/repro section. I left it in track changes. There are still outstanding issues, e.g., DIT, MOA). We can chat about that next week. Have a great weekend! Sue

Hi Sue,

I've been adding to this file so it would be good if you were to add your changes to it. If you have been editing a different file, you could just copy and paste it into the relevant place. Let me know if this will be OK.

Thanks, Barbara
